Website checklist for cafés & restaurants

Hungry customers are on their phones

SWIPE →

Your homepage should show

- Opening hours, front and centre
- Address with a map
- Your menu as real text
- A phone number that taps to call
- Real photos of your food
- A booking or enquiry button

01

Menu as text, not a PDF

PDF menus mean pinching, zooming and giving up. Text loads fast and Google can read it.

02

Hours first

“Are you open?” is the first question. Answer it before they ask.

03

Show the place

Real photos of your food and your space beat stock images every time.
